

How to exchange USDC on Polygon?

Whether to buy a Dollia Gene NFT or to purchase DLST Tokens requires USDC settlement.

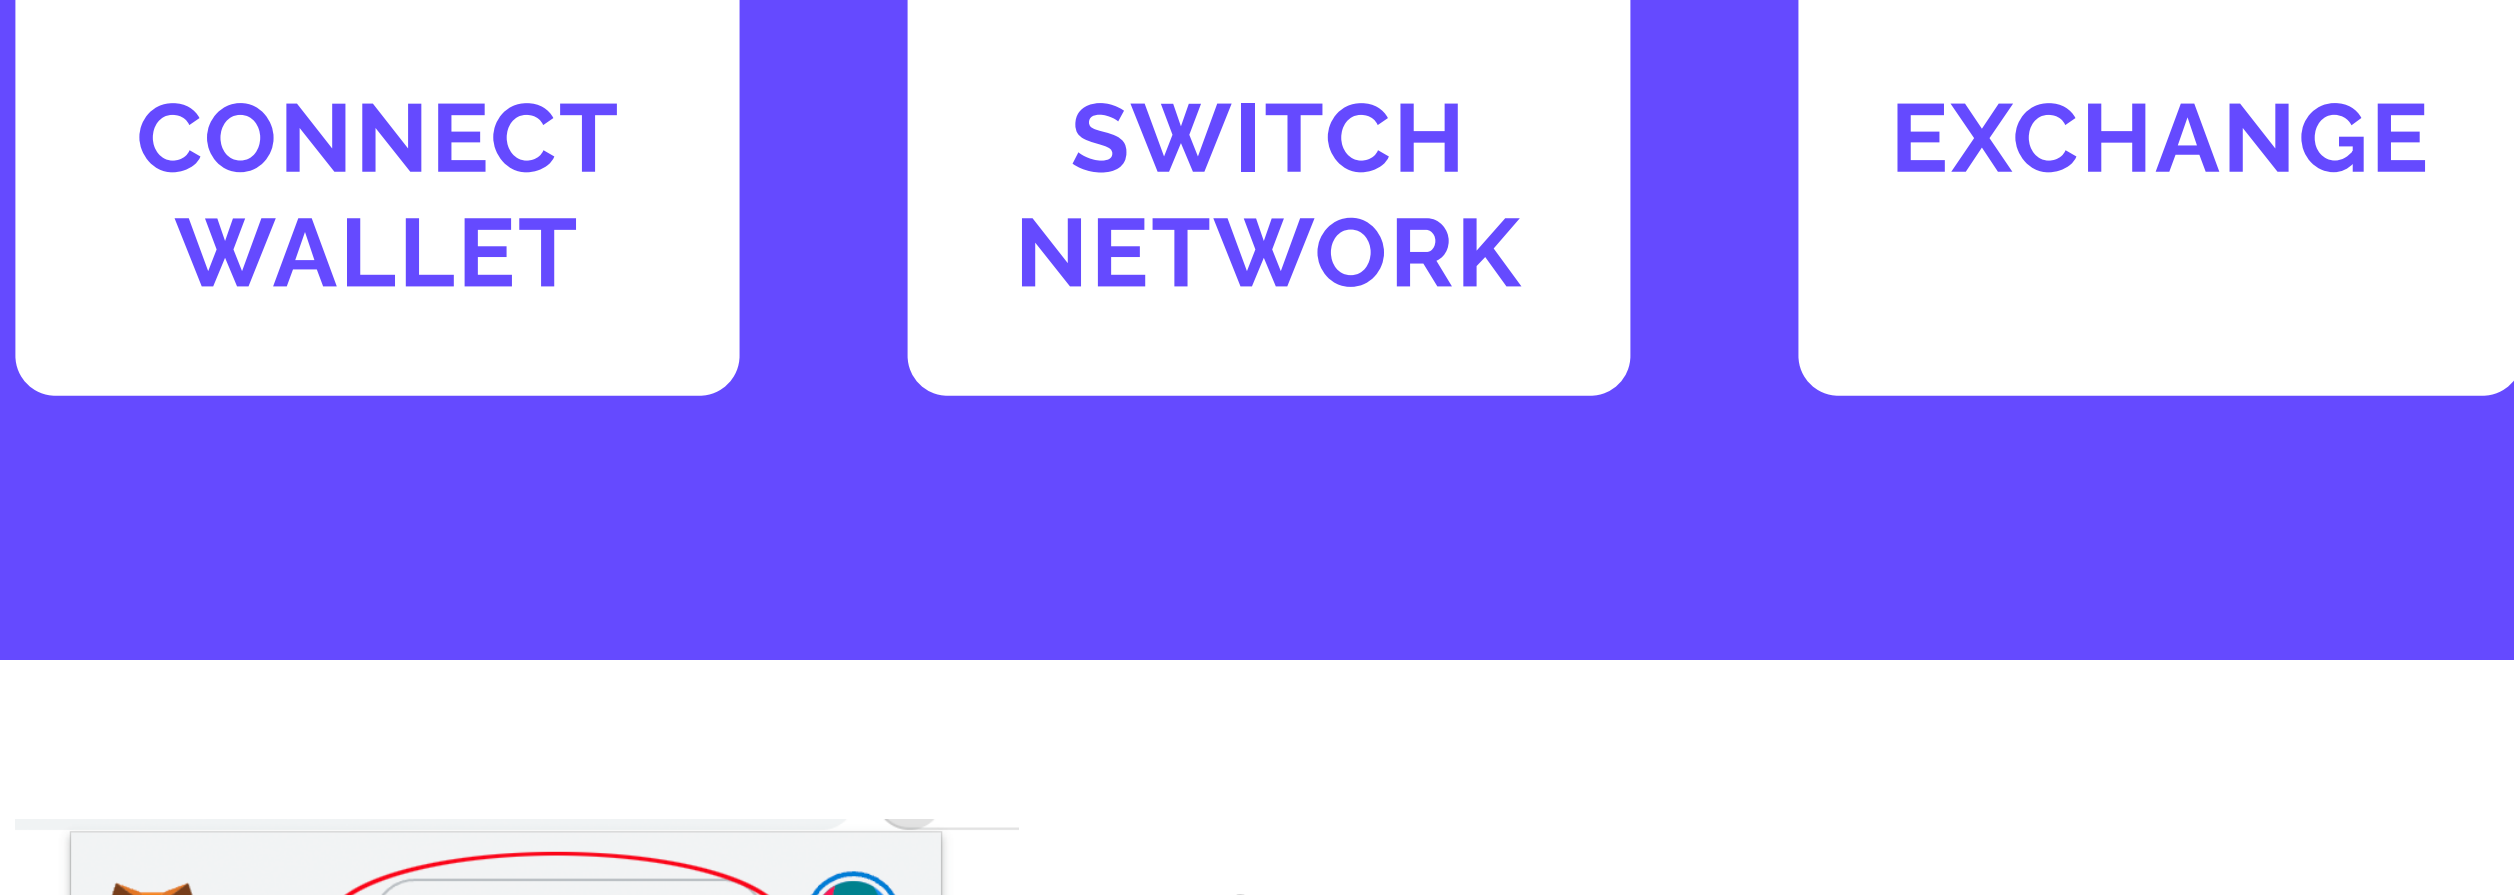

In response to the user's request, we produced this tutorial, which also works for other currency exchanges on Polygon.

A Quick Know

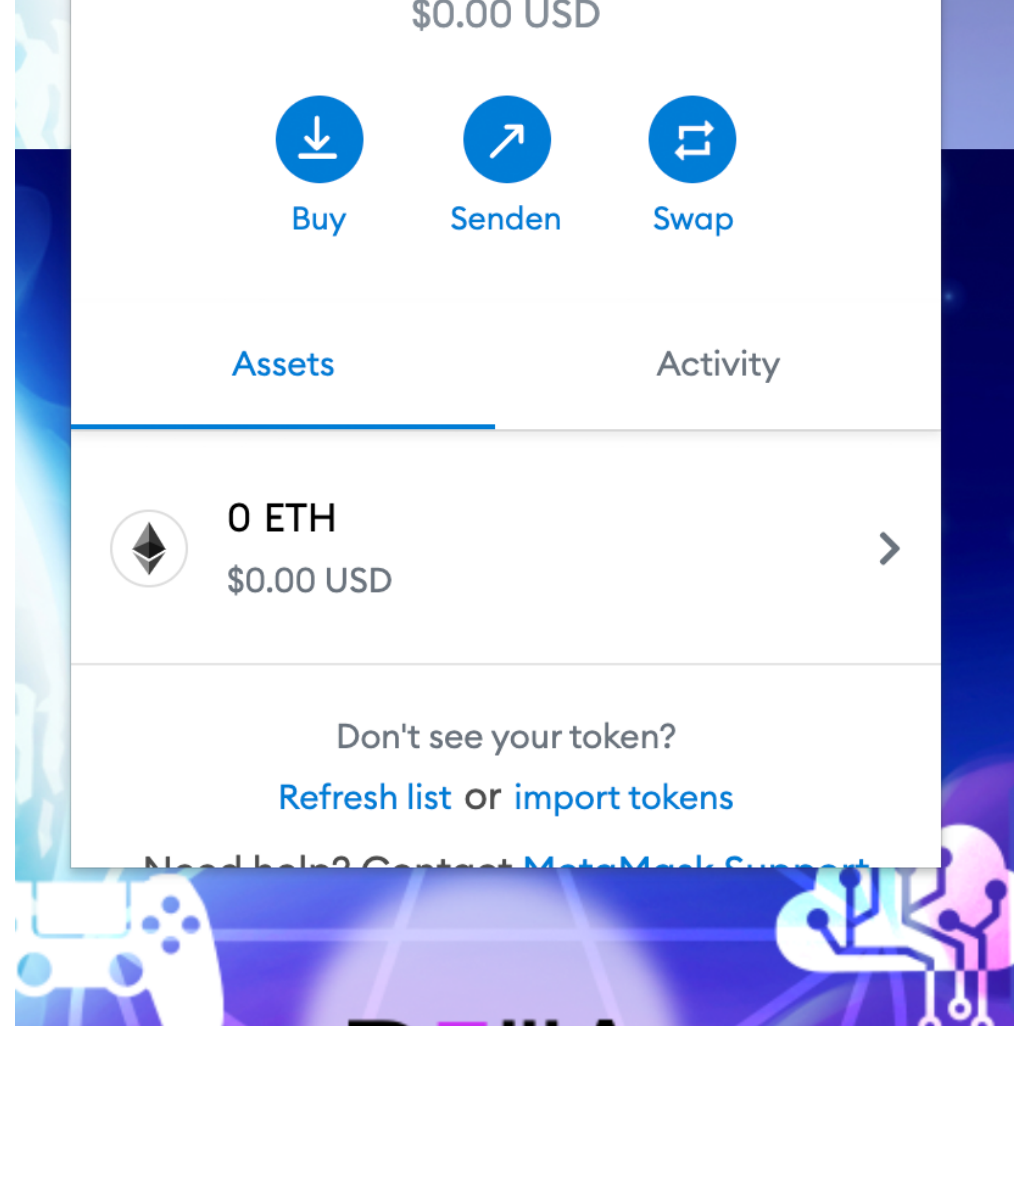

Polygon is an excellent blockchain solution for Layer2. GAS costs are extremely low due to PoS based Ethereum layer 2 network. Customers need to use the native MATIC as a GAS fee to deliver their daily business. Therefore, switching from ETH to Polygon can maintain the value consistency of various major cryptocurrencies, which are based on ERC20.

3 Steps

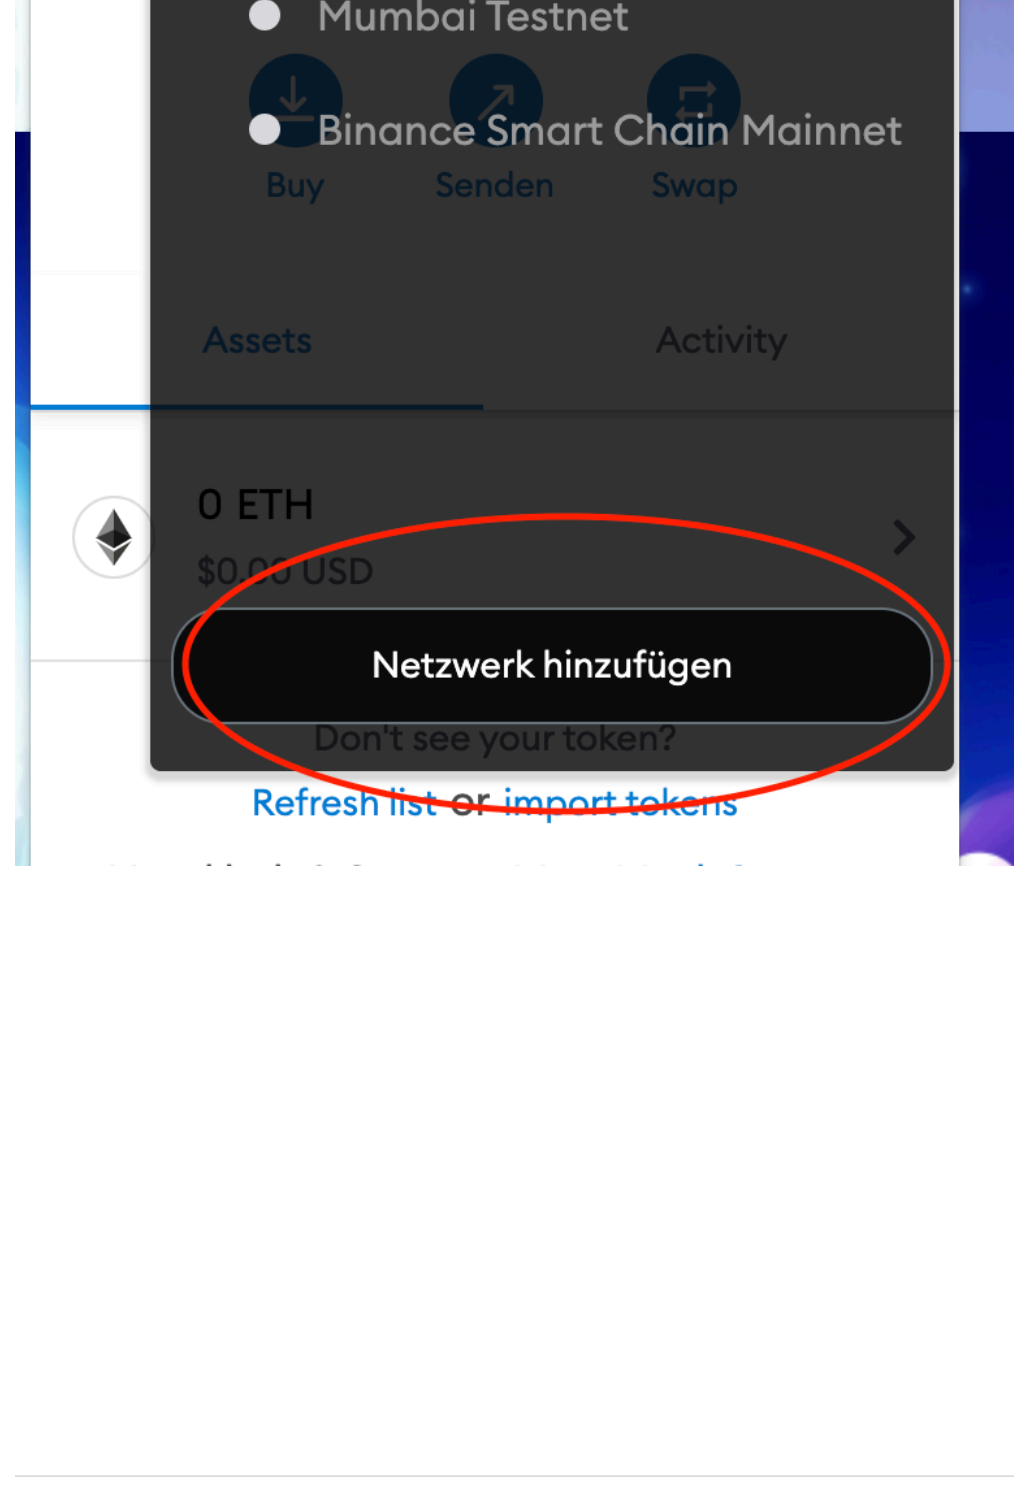

Step 1

Log in and connect to the wallet, and click Network

Step 2

Click Add Network

Enter in the Matic Mainnet settings as follows:

Network Name: Polygon

New RPC URL:

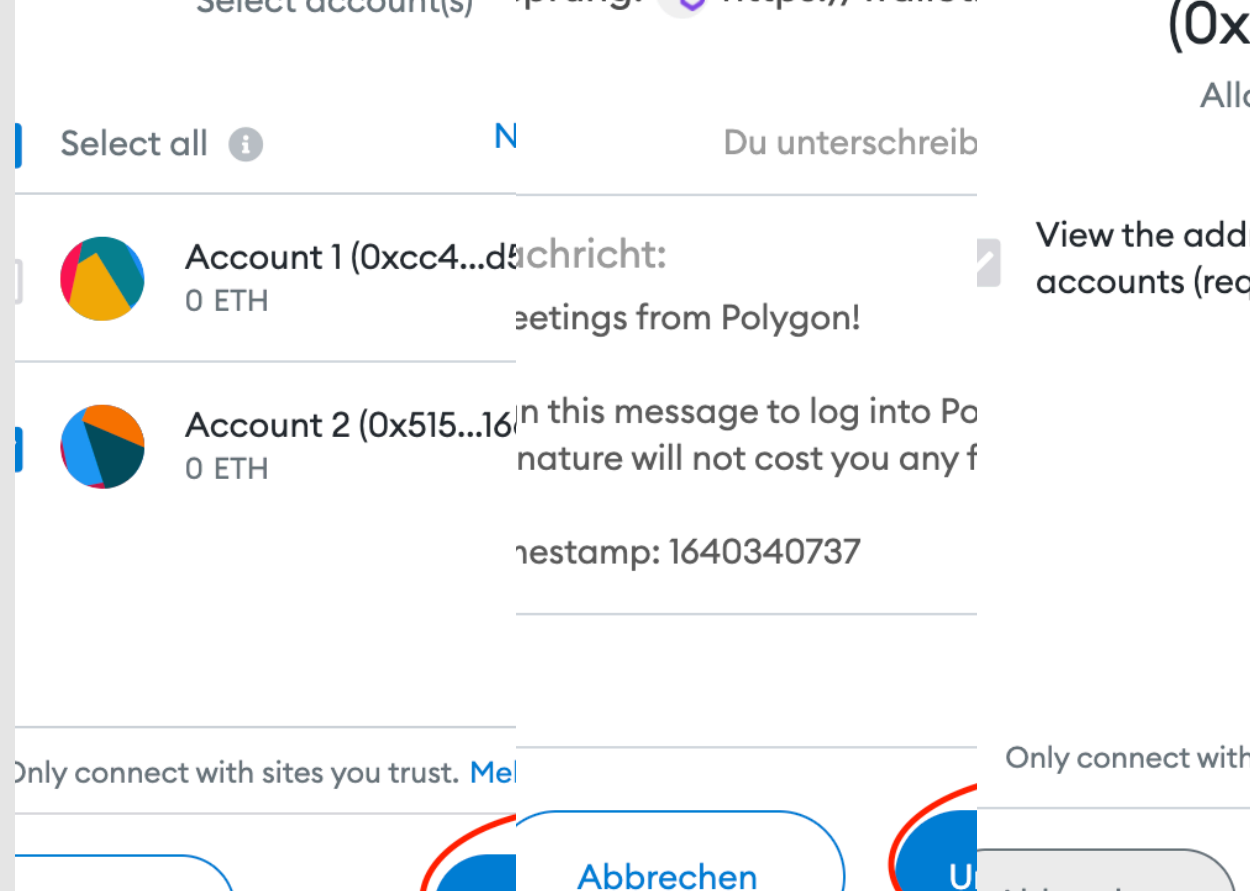

<https://polygon-rpc.com>

ChainID: 137

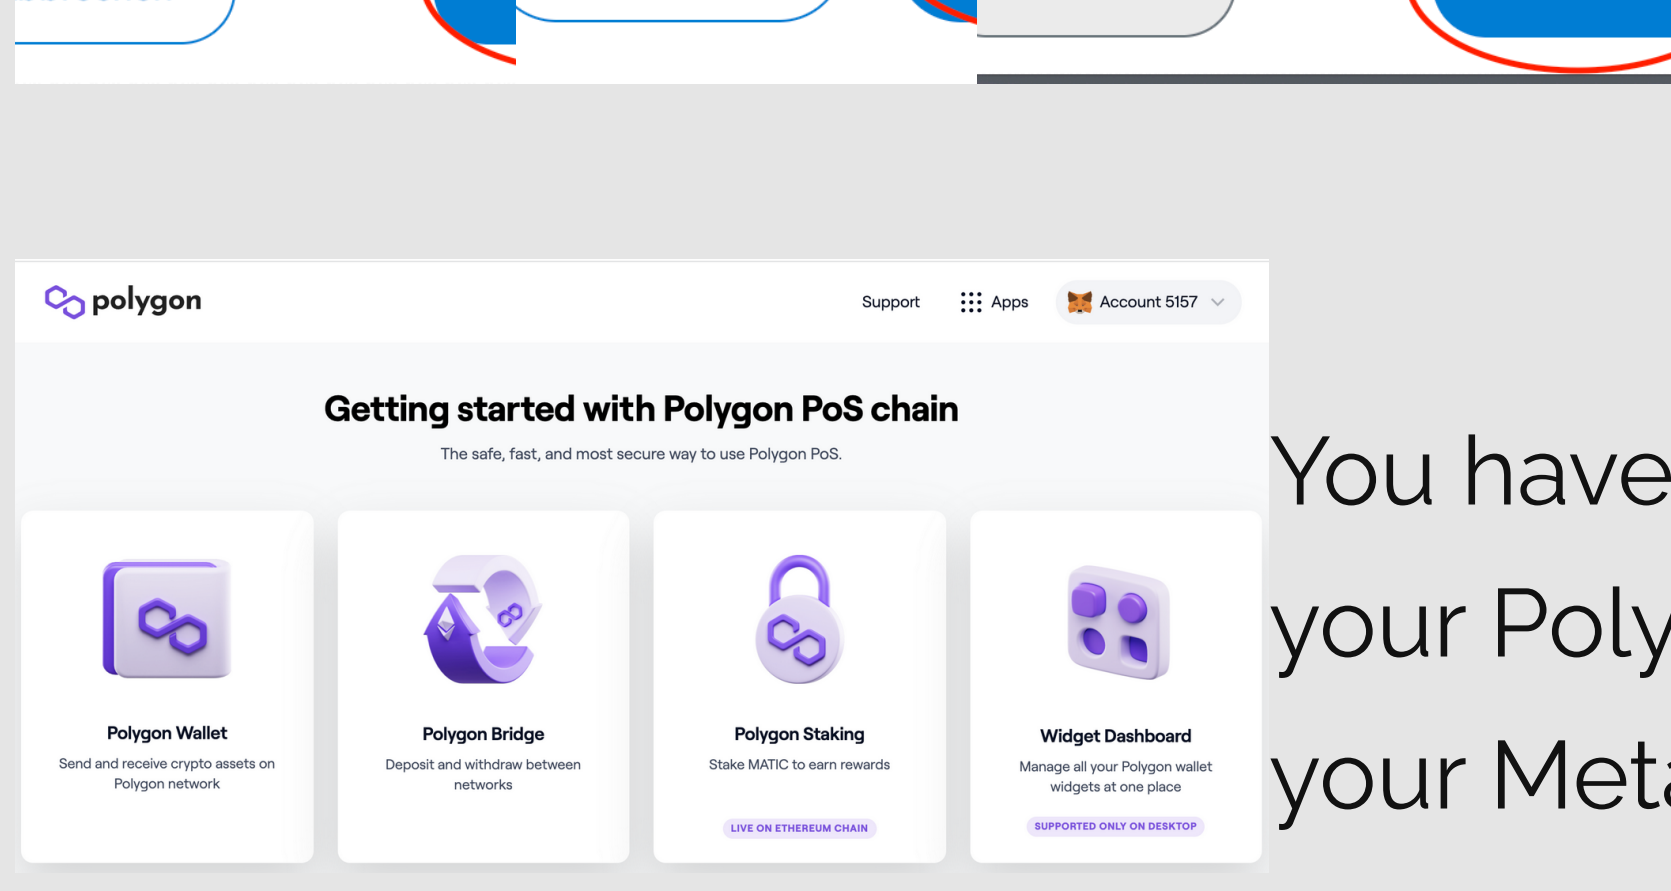

Symbol: MATIC

Block Explorer URL:

<https://polygonscan.com/>

Polygon provides a web wallet service, visit <https://wallet.polygon.tech> nology, and click "Connect to a Wallet"

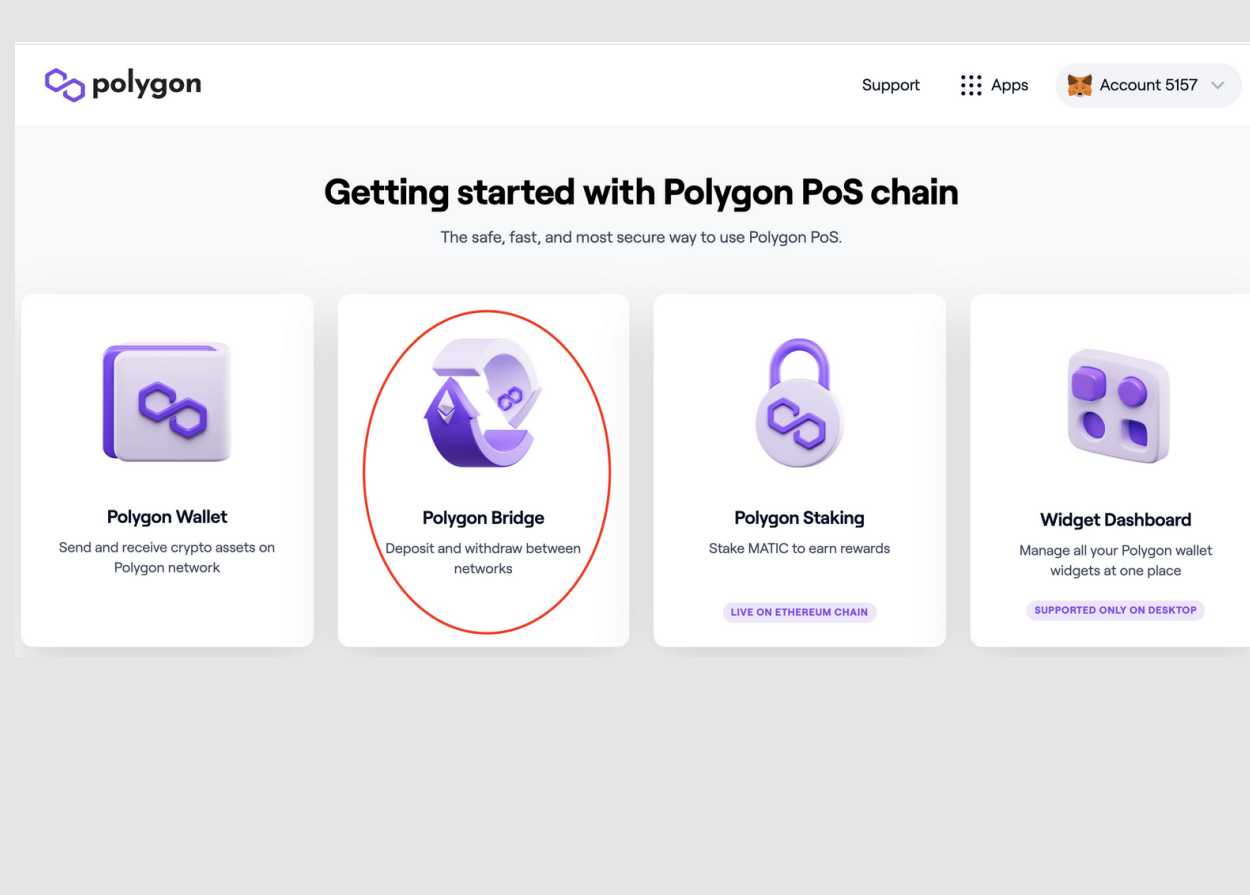

Choose your Metamask wallet.

Click "Next".

Click "Sign".

Click "Connect"

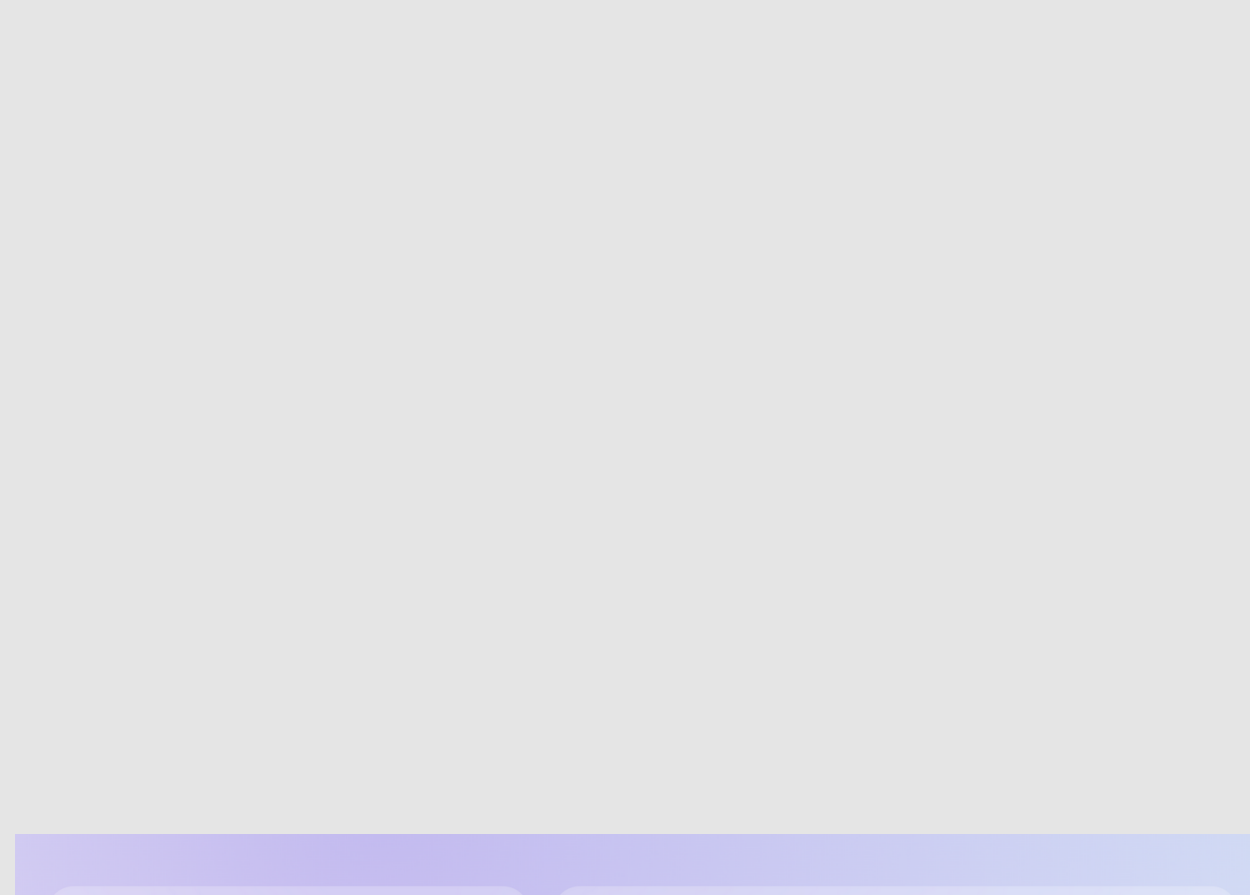

You have already connect your Polygon web Wallet to your Metamask Wallet!

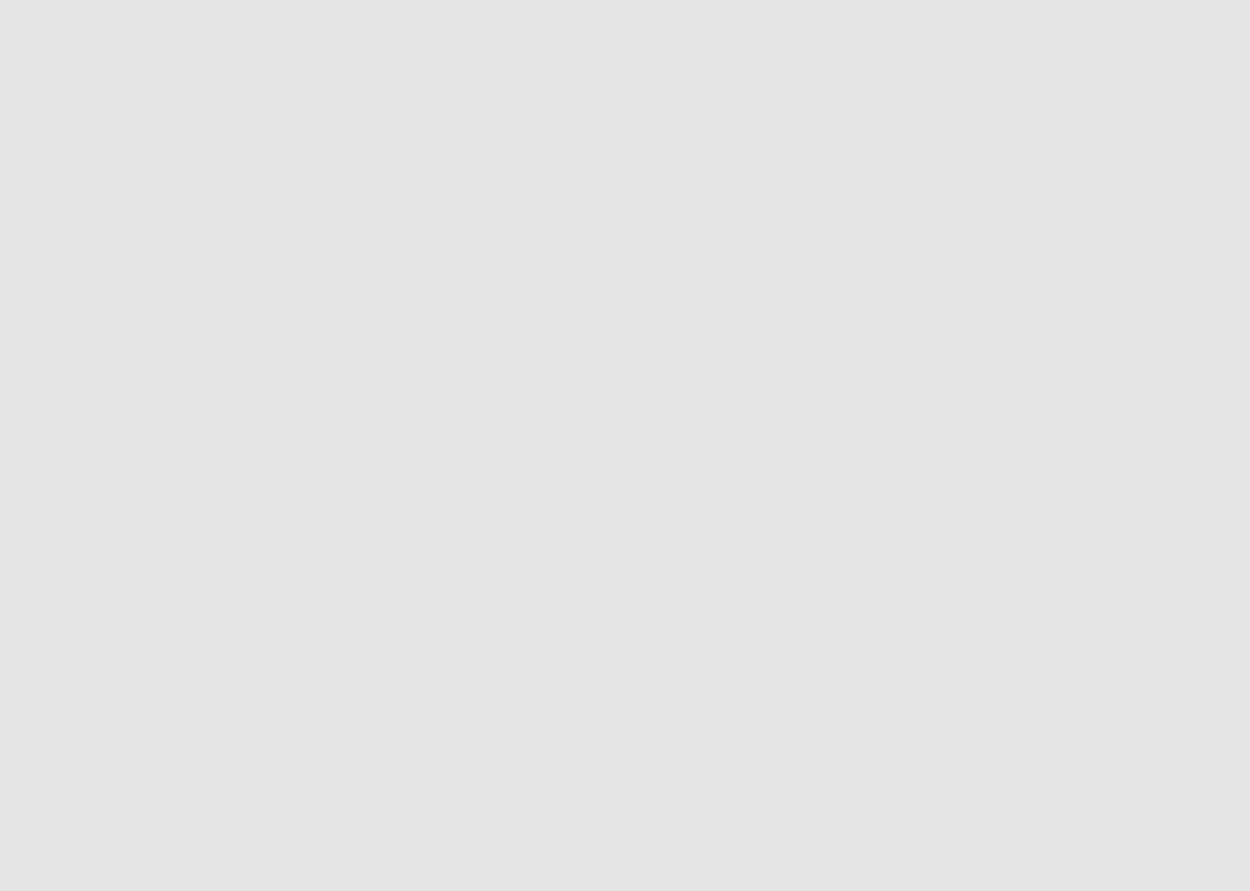

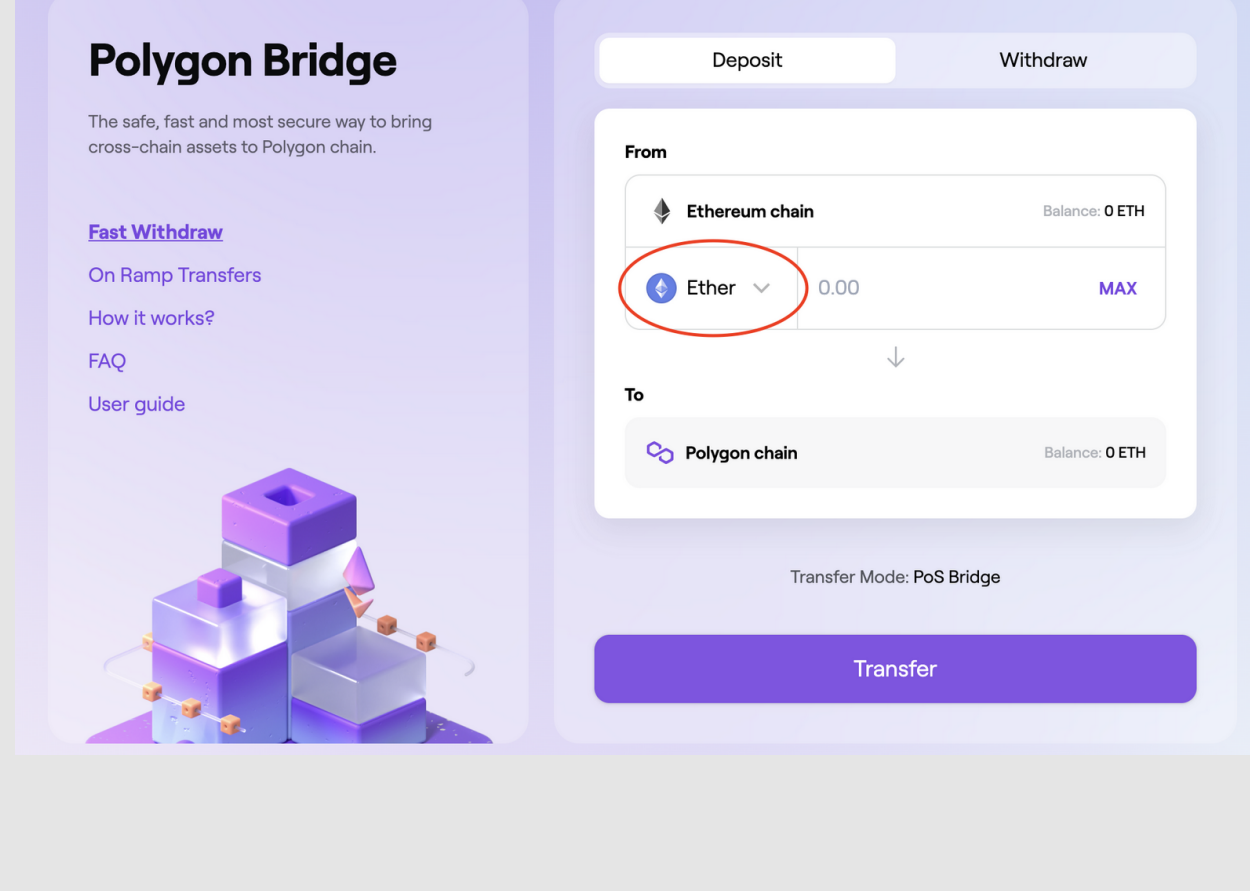

Use Polygon Bridge to swap your cryptocurrencies to Plygon.

Click **Polygon Bridge**.

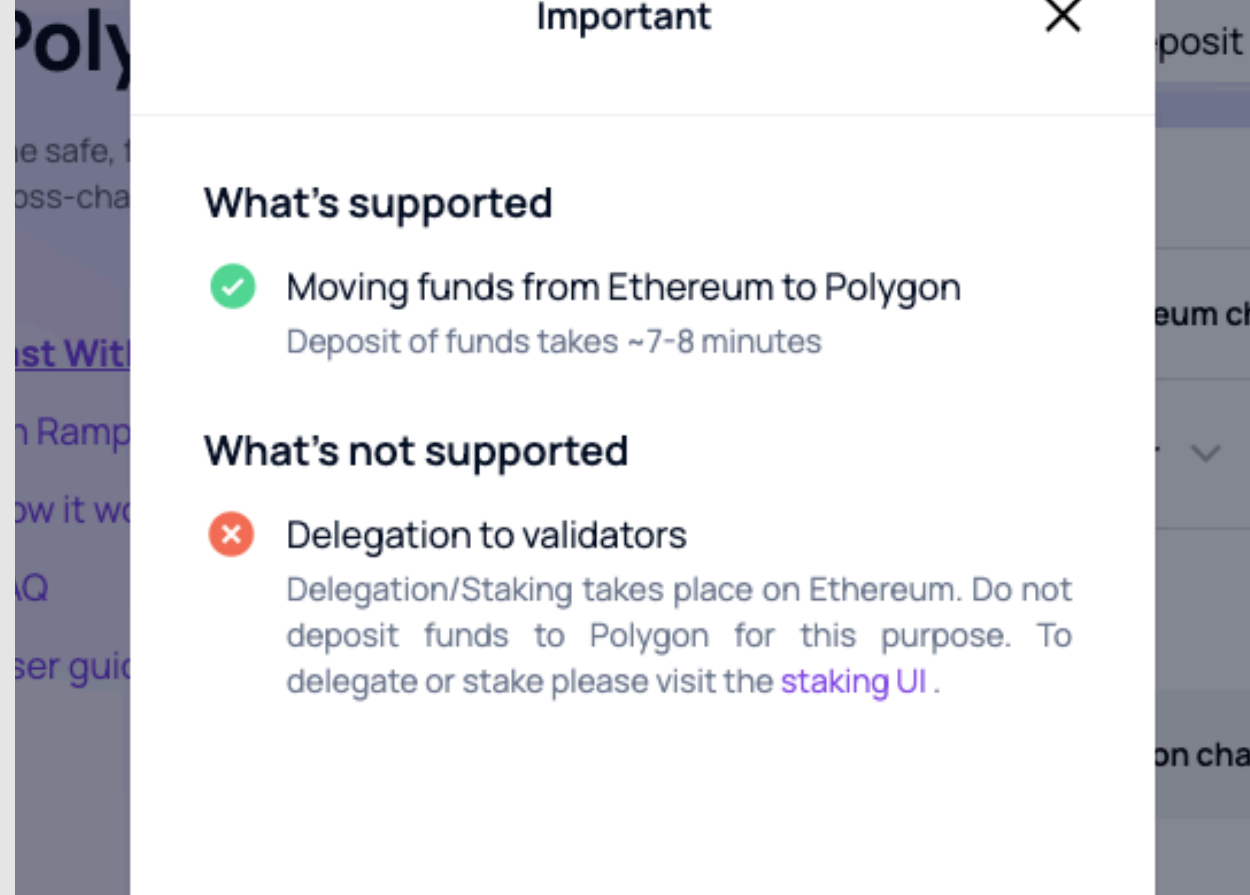

Step 3

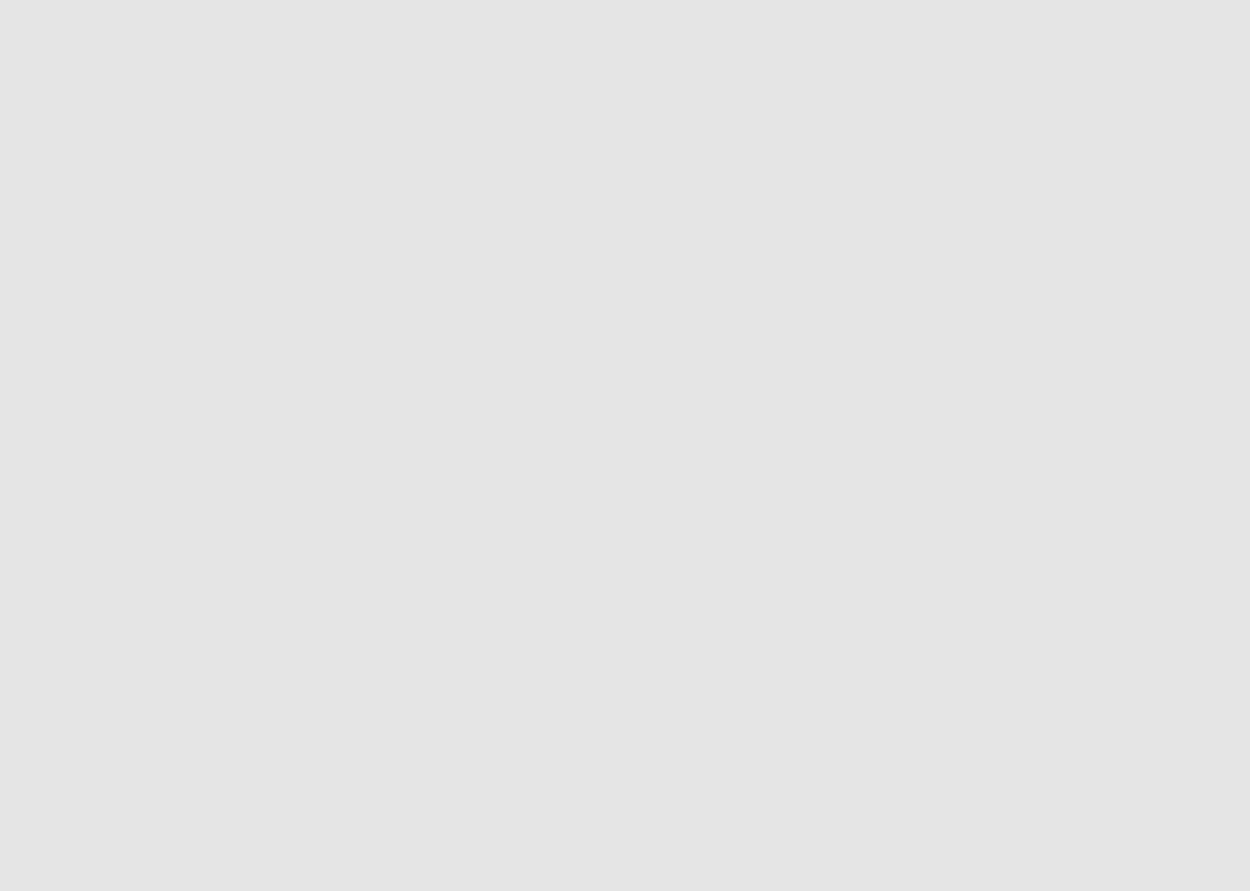

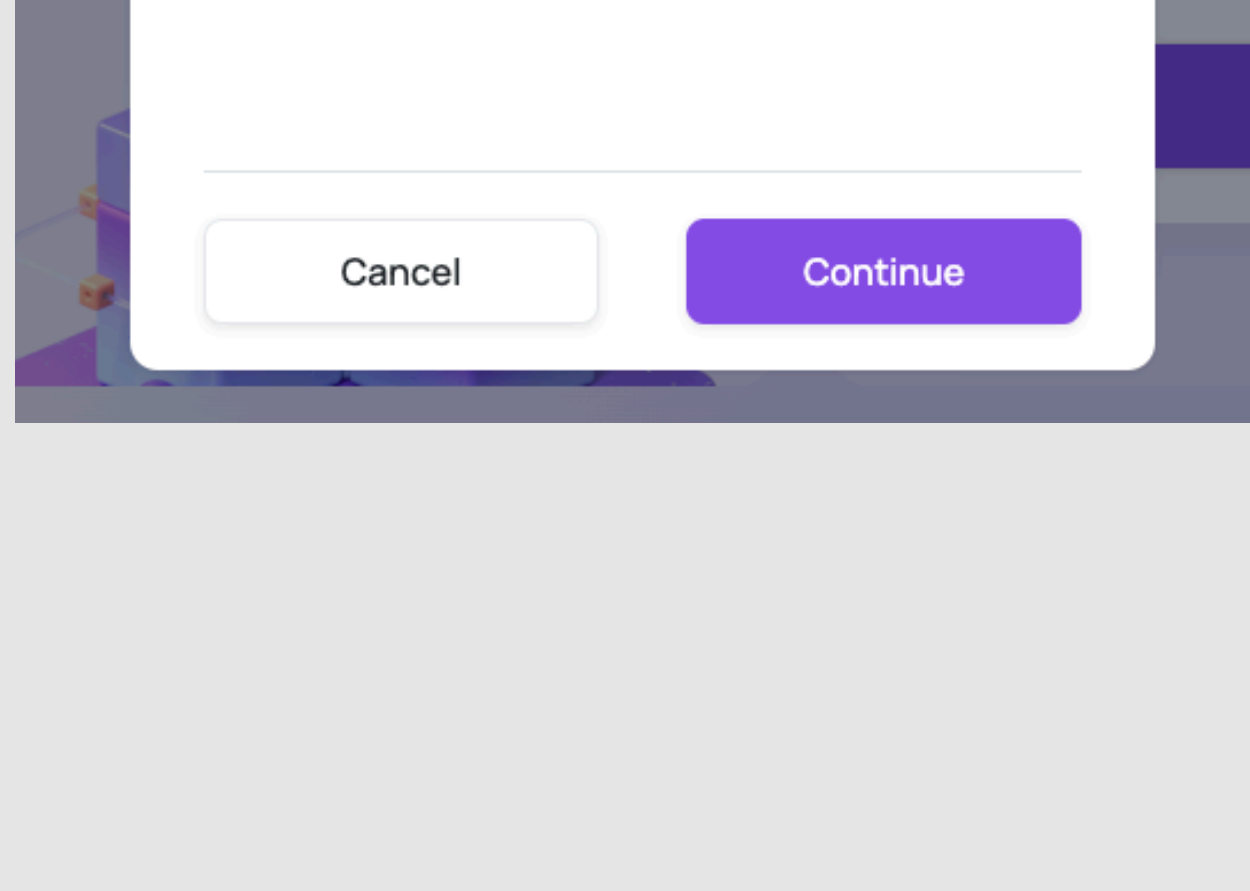

Select the currency you want to exchange, here in Dollia Project, please choose **USDC**.

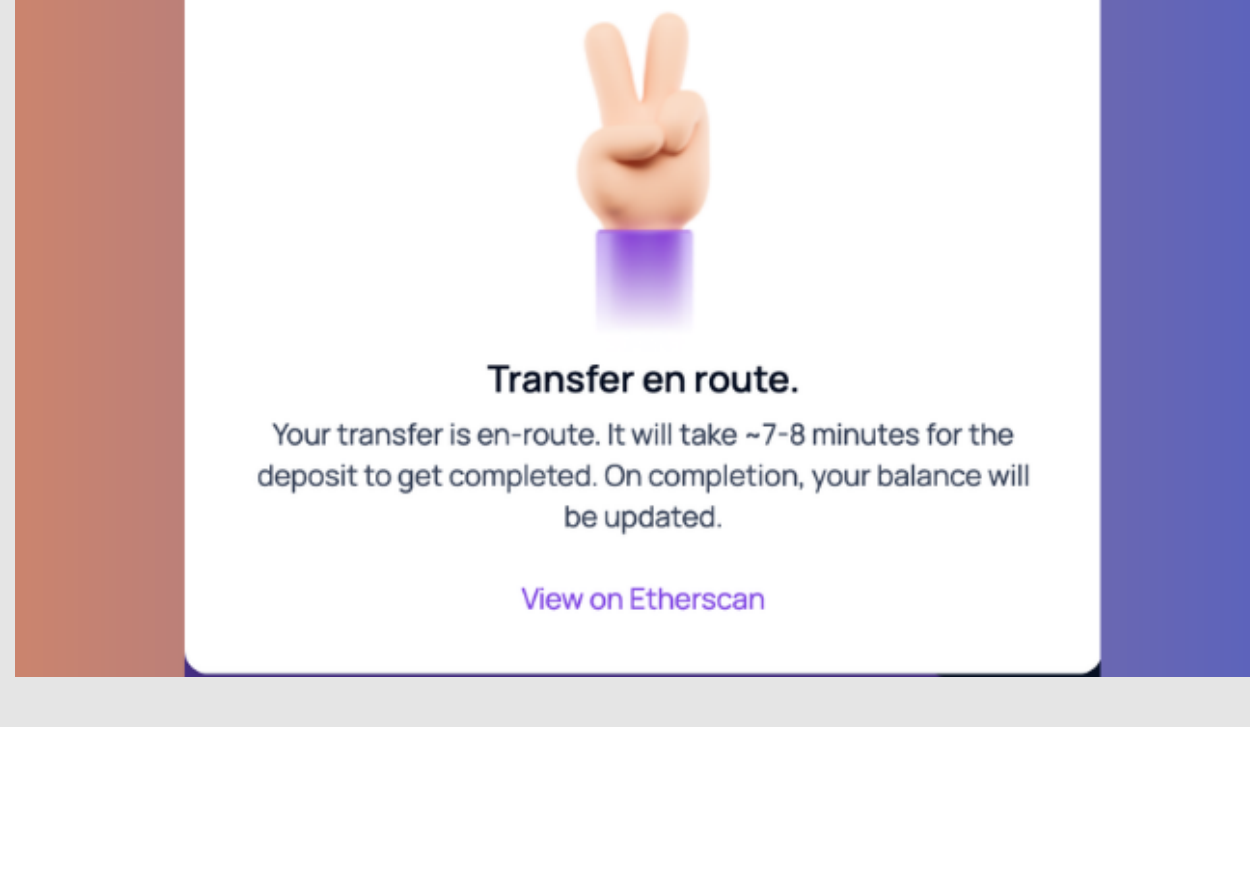

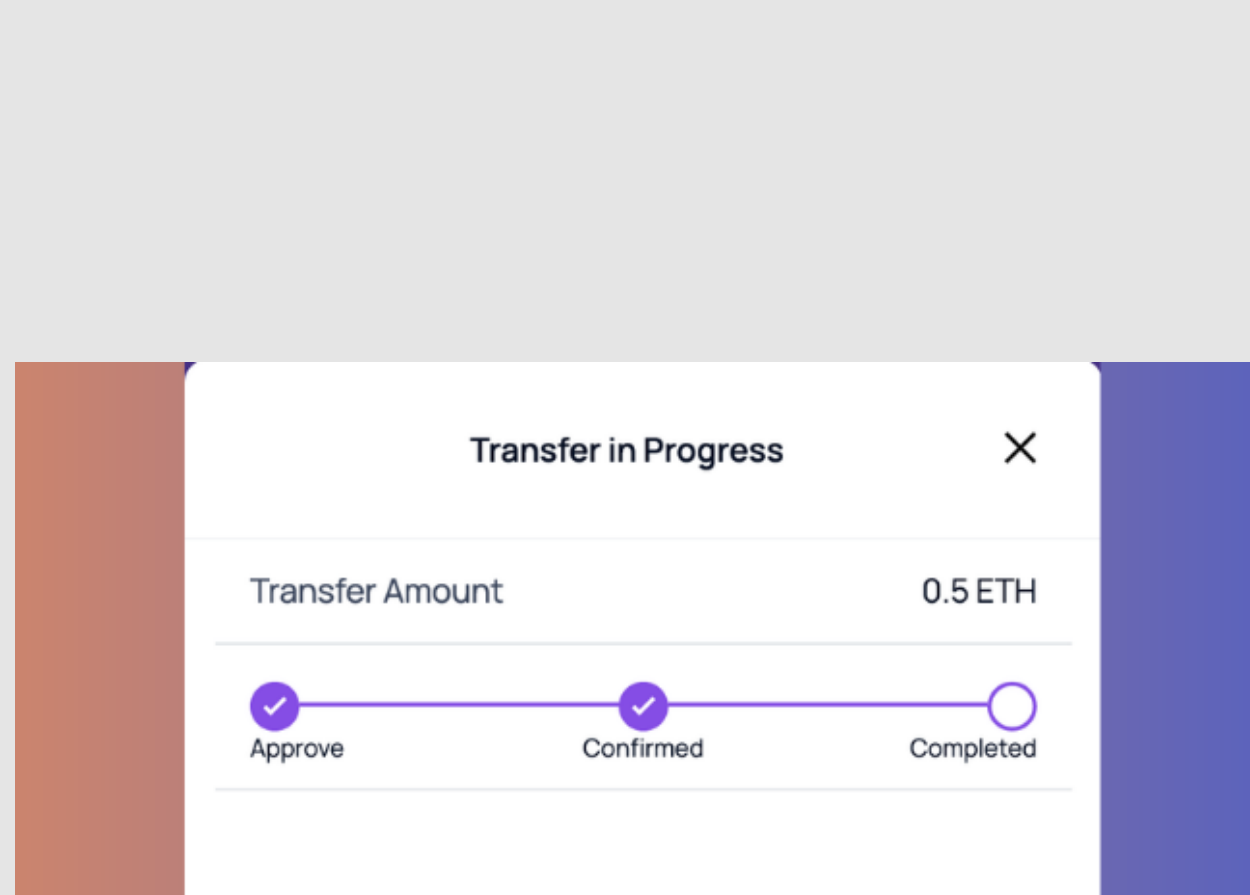

You will be prompted to sign and approve the transaction in your MetaMask wallet which is where the gas fee will also be quoted, and you will see a progress tab bar indicating when your transfer is complete.

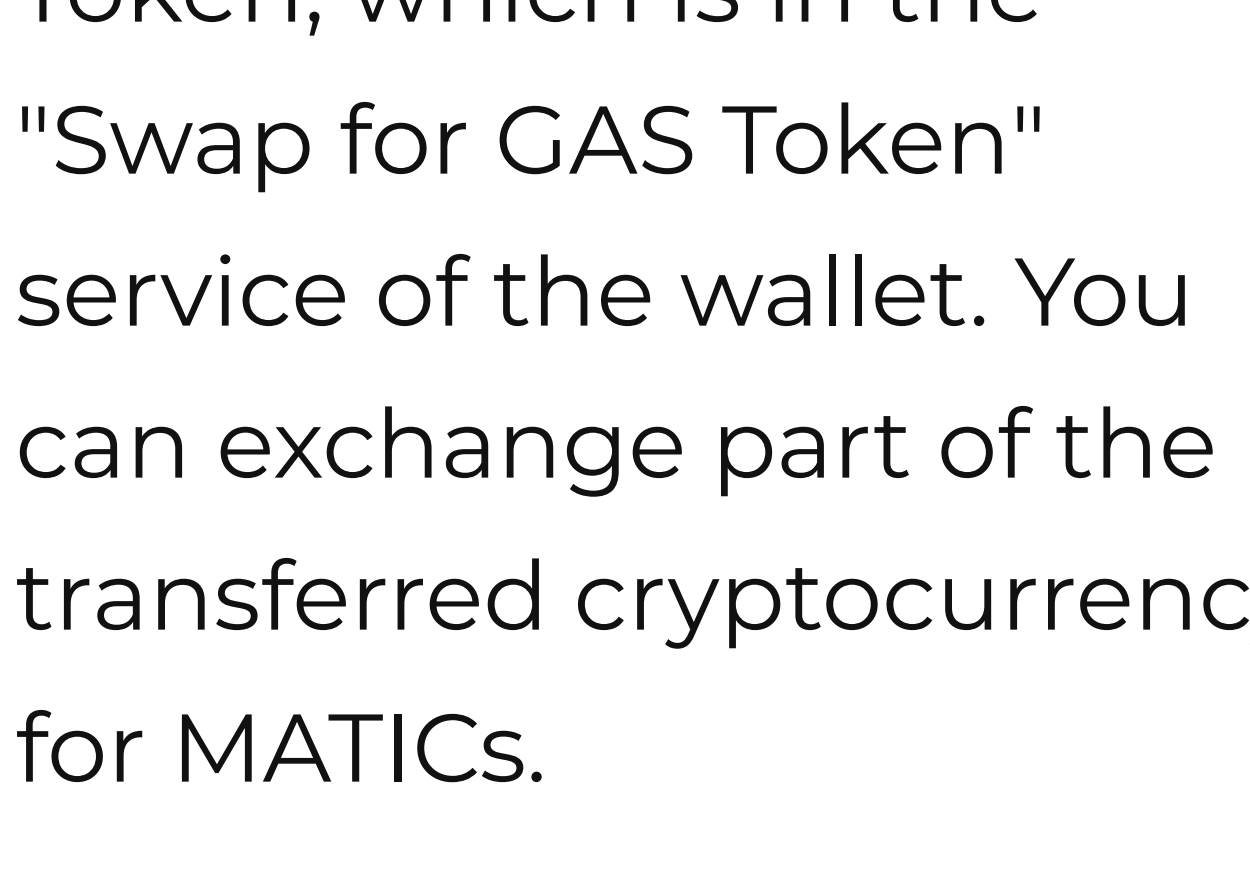

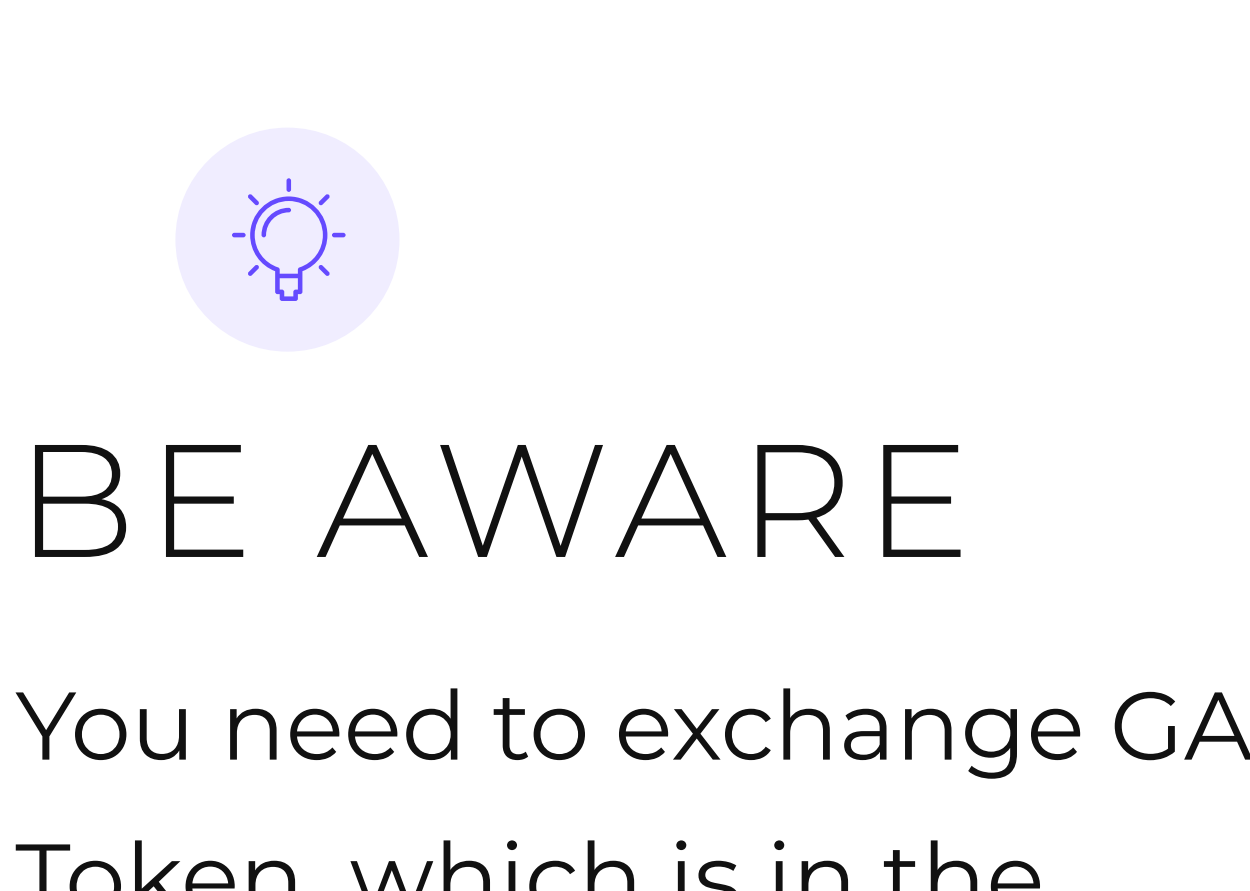

Note that the Proof of Stake (PoS) bridge is secured by validators and will take approximately 3 hours when/if you want to move your funds back to Ethereum.

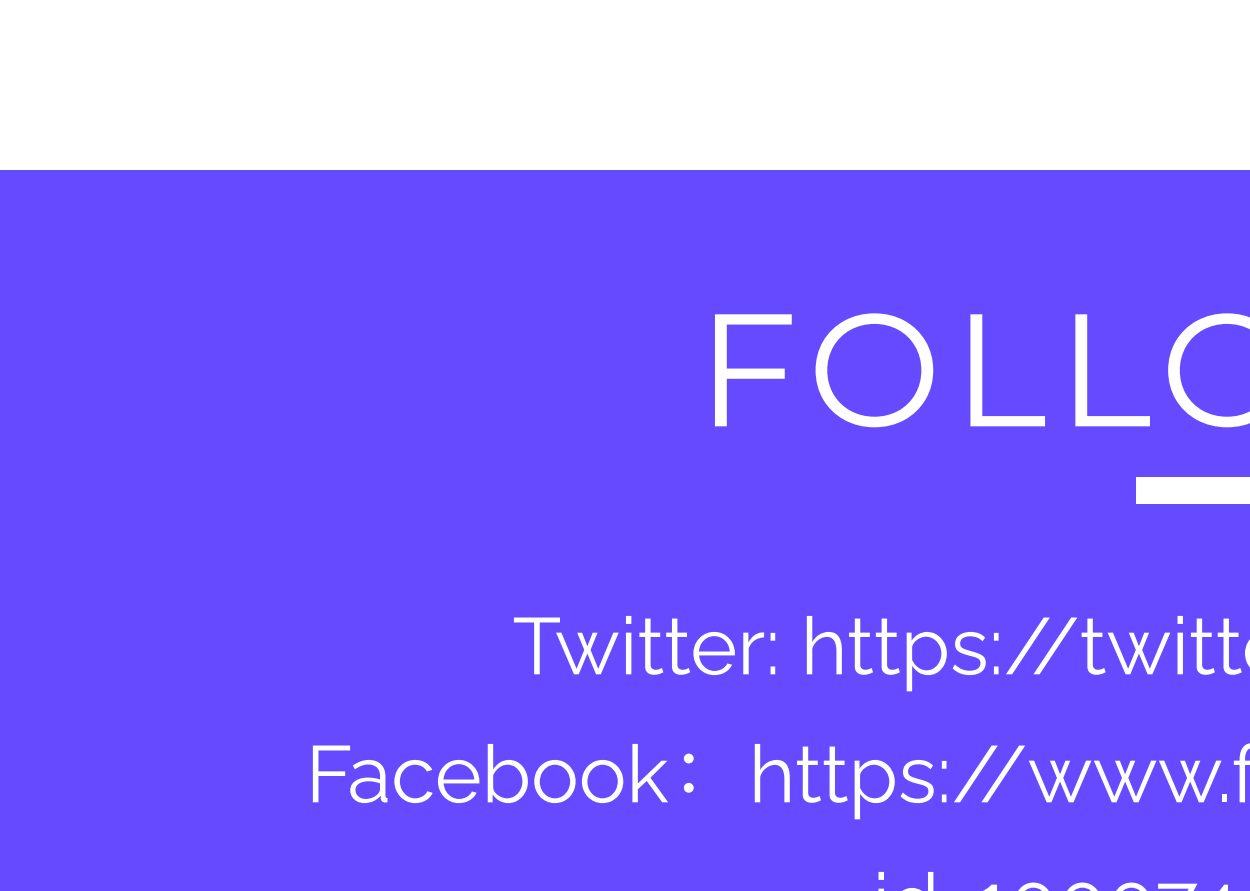

Note that the Proof of Stake (PoS) bridge is secured by validators and will take approximately 3 hours when/if you want to move your funds back to Ethereum.
